Hello Jake,

How is City of Greensboro, NC utilizing the latest technologies to modernize the visitor check in process? **NEC's Front Desk Assistant** uses the most accurate facial recognition technology according to NIST testing to bring building security into the 21st century while:

- Working with existing security infrastructure
- Authenticating buildings tenants and repeat visitors and printing personalized visitor badges
- Sends arrival notification via e-mail or SMS specified employee(s)

If your goal is to improve guest experience while streamlining operations, let's schedule a time for a deeper dive to learn how NEC can assist. Book a time on my calendar now by following this link https://app.hubspot.com/meetings/bobby-brown22/meet-with-bobby-brown

Thanks,

Bobby Brown
